They set out to provide an atlas for senior medical students and junior residents that would explicitly and plainly describe the indications, techniques, and complications of invasive bedside procedures. They succeeded in producing a manual that should supply a solid conceptual framework to the surgeon training to perform all types of procedures commonly done in intensive care units, emergency rooms, and the surgical wards.

### Atlas of Bedside Procedures | JAMA Surgery | JAMA Network

This large expensive paperback atlas presents 40 of the most necessary and important invasive procedures available to the modern physician. The editors have compiled an extensive selection of procedures. The authors present a specific approach to the performance of each, and also list major...
