Start strengthening exercises, such as the forearm extensor exercise and wrist curls. Make a fist with your hand to increase the pressure on your wrist and stretch in your forearms while performing the extensor exercise described in the previous section. This will deepen the exercise and make it more rewarding.

How to Exercise after Carpal Tunnel Surgery: A 3-Week ...

Carpal tunnel syndrome is caused by compression of the median nerve as it passes through the carpal tunnel and under the transverse carpal ligament at the wrist. Nerve-gliding exercises — one type of carpal tunnel exercise — might help the median nerve move normally, but might worsen symptoms. If a median nerve remains trapped, nerve-gliding exercises can stretch, irritate or injure the nerve.
