Estimating Sums And Differences With

Estimate the sums and differences in these printable worksheets, designed for grade 3, grade 4, and grade 5 children, by rounding each number to the nearest ten, hundred, thousand or hundred thousand. Front-endestimation method may also be used to estimate the value in some of the pdf worksheets. Grab hold of a few of these handouts for free!

Estimating Sums & Differences Worksheets

Students learn to estimate a sum or difference by first rounding each number to the place specified in the problem. For example, to estimate $4,909 + 3,217$ by rounding each number to the nearest thousand, first round 4,909 up to 5,000, and round 3,217 down to 3,000, then add $5,000 + 3,000$ to get 8,000.

Estimating Sums and Differences - Math Help

Estimating differences Use rounded numbers to estimate differences. Example 2 Give an estimate for the difference $317,753 - 115,522$ rounded to the nearest hundred thousand.

Estimating Sums, Differences, Products, and Quotients

The first step in estimating a sum or a difference is to round the numbers, by changing them to the nearest power of ten, hundred, thousand, etc. Round the numbers first, then use mental math to estimate an answer. When rounding, follow these rounding rules: If the number being rounded is less than 5, round down.
