ASSET ADEQUACY ANALYSIS PRACTICE NOTE DECEMBER 2004

As discussed in Appendix A-010, a prospective gross premium valuation is the ultimate test of the adequacy of a reporting entity's accident and health reserves as of a given valuation date and shall be determined on the basis of unearned premium reserves, contract or additional reserves, claim reserves (including claim liabilities), and miscellaneous reserves combined; however, each component shall be computed separately.

Statement of Statutory Accounting Principles No. 54 ...

Net premium valuation is a reserve methodology, where net premiums are the amounts necessary to pay benefits according to certain mortality and interest assumptions. Company expenses are not reflected in the net premium reserve, nor are there any explicit margins for profits or adverse experience. This uses theoretical premium with no link to the actual premium paid.
