In the second episode of Netflix's space drama "Away," two astronauts head outside into space to make some emergency repairs. Emma Green (Hilary Swank), the American commander of the ...

'Away' on Netflix: How close it gets to real Mars space ...

The current Reference Mission calls for a nuclear reactor to propel the spaceship to Mars. This is desirable because nuclear propulsion reduces travel time to Mars, increasing safety for the crew by reducing their exposure to cosmic rays. Also, a chemically-powered spacecraft weighs much more and costs a lot more to launch.

NASA - New and Improved Antimatter Spaceship for Mars Missions

One example is Mariner 9, which entered Mars orbit in 1971 and is expected to remain in orbit until approximately 2022, when the spacecraft is projected to enter the Martian atmosphere and either burn up or crash into the planet's surface. The Viking 1 orbiter is predicted not to decay until at least 2019.

List of missions to Mars - Wikipedia

The BFR is not a Mars-specific system; the spaceship will be able to land anywhere in the solar system, Musk said. He envisions such ships helping to set up an outpost on the moon in the relatively...
