Learning to build wheels is an important milestone in the education of an apprentice mechanic. A "mechanic" who has not mastered this basic skill cannot be considered to be a fully-qualified, professional, and will always feel inferior to those who can list wheelbuilding among their skills.

Wheelbuilding - Sheldon Brown

The first step to building up a wheel is to figure out the spoke lengths for both sides of each wheel. Due to the prevalence of disc brakes on mountain bikes, most wheels today have four different lengths of spokes. The following websites have formulas to help you calculate your spoke length. You can choose any site for this task:

Roger Musson's "Professional Guide to Wheel Building"

Part I. WHEEL-BUILDING 1. This applies to: — ALL TYPES OF WHEELS Examine Rim (where rim tape fits) for position of valve hole relative to the first and second spoke holes, noting the holes on the left, 'C' or 'D'. (In the case of dimpled rims care must be taken to hold the Rim in position so that holes 'C' or 'D' are dimpled).

COMPLETE WHEEL-BUILDING INSTRUCTIONS

Custom wheelbuilding has now stopped. Please see the wheelbuilding book, it contains everything I know about building and repairing wheels. Wheelbuilding courses. Do you really need a course? If you want to learn how to build a wheel then get the book and if you have any questions then just ask.

Bicycle wheels, wheelbuilding book and courses

If it's your first wheel, start with new stuff. Rebuilding a wheel with bits that have already deformed slightly is a much more advanced skill and the reason people think wheelbuilding is hard in the first place. 2. Stop before you get frustrated. 3. Get a spoke tension meter. It's possible to build a perfect wheel by feel/ear, but a tension meter takes the guesswork out. My new touring wheels are 120kgf driveside and 80kgf non-driveside.

How To: Build A Bicycle Wheel In Ten Easy Steps

The only difference between a wheel you've built yourself and a wheel from a professional wheel builder is that you took longer. Actually, there's another difference: you'll enjoy them more. "I like to do some things the old-fashioned way" All you need is a rim, some spokes and nipples, and a hub, plus a spoke key and a screwdriver.

Building a bicycle wheel - Patrick Taylor

The list of essential wheel building tools starts with a truing stand. Park Tools TS-2.2 professional wheel truing stand is a common sight, not just in the studios of wheel builders, but in bike...
