### Programming And Cloning Automotive Transponder

When a cloning device is manufactured, it is designed to clone most of the programmable transponders on the market at that time. Some cloning equipment can be upgraded to the newer programmable transponders using software or add-on hardware. Other cloning devices do not have a path for upgrades. Clonable keys are not universal.

### Programming and Cloning Automotive Transponder-Equipped ...

Programming and cloning are the two methods of creating additional transponder-equipped keys. Programming occurs at the vehicle. Cloning occurs at the transponder-equipped key or fob. When programming, the vehicle's on-board computer records the transponder's value. Programming can be accomplished using a programming device or for some models, on-board programming can be used.
