IT service management (ITSM) is a concept that enables an organization to maximize business value from the use of information technology. ITSM positions IT services as the key means of delivering and obtaining value, where an internal or external IT service provider works with business customers, at the same time taking responsibility for the associated costs and risks.

What is IT service management? | ITIL | AXELOS

Service request management and incident management are both reactive; their only difference is the trigger: human versus an unplanned event. Change and problem management, in contrast, are proactive.
